

Take Control of Your Future TRAIN TO BE AN EKG TECHNICIAN!

ADVANCE YOUR CAREER IN HEALTH CARE

Do you have an interest in making a life-changing difference by helping people of all ages prevent and treat heart disease? Are you looking to expand your credentials in the healthcare field? Training to become an EKG Technician might be right choice for you. The health care industry on Long Island is one of the fastest growing sectors, and the outlook for the EKG Technician job growth is projected to increase faster than average. Employment opportunities exist in doctor offices, hospitals, diagnostic offices, and rehabilitation centers.

EKG Technicians perform electrocardiograms which monitor the patient's heart and can help detect certain heart conditions. Learn how to operate EKG equipment, gain valuable experience running the test on people and prepare for certification all in three months. Job opportunities and salaries can increase as a certified technician. With further training or education, and credentials, over time you can advance your career in health care.

COURSE INFORMATION

Using a combination of classroom and lab learning, this course will prepare students to sit for the EKG Technician Certification exam. Students will be taught the basic Anatomy and Physiology terminology associated with the heart and circulatory systems, signs, and symptoms of diseases, and the electrophysiology/conduction system of the heart. Lab sessions will provide hands-on practice, as well as allow students to meet the requirement for performing EKGs on live individuals. Students must attend all classes and complete assignments, including all practical skills in order to sit for the certifying exam. **Textbook, materials, and certifying exam are additional costs.**

CE1 235 C1 Meets on campus classroom: Monday, Wednesday, and Thursday 10:00am-1:00pm for 20 sessions.

July 7 – August 19, 2021. The NAHP exam date is scheduled for August 19, 2021.

Fee: \$895

Maintaining the health and safety of the NCC community is of the utmost importance and as such the College has implemented a testing program to detect COVID-19 cases on the campus. This requirement is to help ensure health and safety. Participation in the surveillance testing program is mandatory for all students enrolled in face-to-face classes in order to remain eligible for in-person class attendance.
